Mandatory Skills for AutoSAR Developers:

1. AutoSAR Concepts:

   - Strong understanding of AutoSAR architecture, both Classic and Adaptive platforms.

2. Adaptive AutoSAR:

   - Experience with Adaptive AutoSAR, including configuration, integration, and deployment of services.

3. Operating Systems:

   - Proficiency in QNX or Linux for developing and testing AutoSAR-based applications.

4. Programming Languages:

   - Strong expertise in C++ for embedded systems development.

   - Knowledge of C or Python for scripting and application development.
